

CRANE INSPECTOR TRAINING

IN-PERSON & REMOTE

CraneWorks University invites you to participate in a certification program for overhead crane and hoist inspection in Morristown, Indiana. The course is led by 20-year industry veteran Peter Cooke, who has not only trained crane and hoist inspectors for two decades, but has also served on committees of several nationally-recognized bodies (ASME, NCCCO), actually helping write their inspection certification exams. Upon course completion, attendees will be certified to perform crane and hoist inspections to OSHA standards, as well as possess a more sophisticated understanding of the overhead crane industry, its equipment and regulations.

BENEFITS

ACHIEVE certification to perform crane and hoist inspections to OSHA standards

GAIN competency in spotting, evaluating and reporting safety-related items

LEARN to interpret national and federal crane and hoist regulations, standards, and specifications

RECEIVE an OSHA crane inspection certificate and wallet card, plus course literature including photos, charts, and content for all inspection items covered in the course

MORRISTOWN, IN

LIMITED TO 15 SEATS!

ABOUT THE INSTRUCTOR

Peter Cooke's career has spanned over 20 years as an Engineer and Training Manager for the Columbus McKinnon Corporation. As Corporate Training Manager, he developed certification programs for rigging, hoist & crane operations, repair and inspections. Mr. Cooke serves on the ASME B30.9 Slings subcommittee, and is Director of the Rigging Certification Committee for Crane Institute Certification. He's also served on NCCCO Rigging Certification task force and helped develop their Level 1 and 2 rigging certification exams.

CRANEWORKS UNIVERSITY IS OWNED AND OPERATED BY:

CraneWorks, Inc.
511 N. Range Line Road
Morristown, IN 46161

*If it's been 2 years since you were certified, it's time to recertify. To qualify, students must have completed CWU's hands-on Overhead Crane & Hoist Inspection Certification training. After a 2-year period, recertification requires students to repeat the full Overhead Crane & Hoist Inspection Certification course.
