

TRAIN THE TRAINER CRANE OPERATOR INSTRUCTOR CERTIFICATION

IN-PERSON ONLY

CraneWerks University invites you to participate in a two-day certification program to become an overhead crane operator instructor. The course will be led by 20-year industry veteran Peter Cooke, who has not only trained crane and hoist inspectors for two decades, but has also served on committees of several nationally-recognized bodies, (ASME, NCCCO,) actually helping write their inspection certification exams. Upon course completion, attendees will be certified to teach overhead crane operation to OSHA, ASME and CMAA standards, as well as possess a more sophisticated understanding of the overhead crane industry, its equipment and regulations.

BENEFITS

ACHIEVE certification to teach crane and hoist operations to OSHA, ASME, & CMAA standards

GAIN competency in running an engaging, informative crane operator training course

LEARN to interpret national and federal crane and hoist operator regulations, standards, and specifications

RECEIVE a crane operator instuctor certificate and wallet card, plus course literature including photos, charts, and content for all items covered in the course
